A Firmo Favourite

Concrete is very much still on trend and the Firmo tile gives you the look of board formed concrete - a process that transfers a wood gradient onto concrete, without any mess or hassle.

Indoor Architecture

A homage to brutalist architecture, the cement-like colouration of the Ceteris tile is offered in a subtle random pattern mixture that successfully pays tribute to this modern design movement.

FIBO WALL PANELS

- 15 Year Guarantee
- Easy & Quick To Install
- No Grouting Required
- Fits Over Existing Tiles
- Low Maintenance
- Easy Cleaning

With our Aqualock tongue and groove system of fixing, Fibo panels are perfect for both refurbishment or new construction projects as panels can be fitted directly to existing walls, including tiles, or onto stud partitioning.

Using Fibo panels provides a wall that is every bit as effective as a tiled one, with a high quality and long lasting surface but without the disadvantages - no grouting to clean and replace, no mould growth, low maintenance, shorter installation time and lower fitting costs.

Do not expose the panels to sustained high temperatures (Max 180 degrees Centigrade)

Simply wipe clean with a mild non-abrasive cleaner and do not steam clean.
